Despite the utes after he first stepped into the water. Employes of the Saltair Beach company had worked over him for a few minutes before he expired.

On the person of the dead man there was nothing to indicate where his home is. It appears from correspondence in his pockets that he was a traveling salesman and was in Coalville, Wyo., for some time last winter.

> Fausler went out to Saltair on the Fausler went out to Saltair on the morning train. After spending some time in roaming around the resort he went to a bathroom and prepared to take a dip in the lake. As he was going into the water he was cautioned by a small boy to be careful. He laughed at the boy, assuring him that he was well acquainted with Great Salt Lake. A minute later the man was struggling in the water trythe man was struggling in the water, try-ing to get his head above the surface. Lads nearby cried for help, but before any of the employes arrived Fausler was overcome and lay stretched out in the lake. He was taken to the bathing pier and every possible method was employed to revive him. After laboring over the lifeless form for an hour and a half the employes gave him up as dead. After the coroner's inquest the body was shipped to the S. D. Evans undertaking parlors to await the action of relatives.

In the dead man's clothing was a tailor's tape and a number of letters and two pocketbooks. There was nothing in any pocketbooks. There was nothing in any of them that would serve to identify his home or relatives. In one of the books on a page for information, all the blanks were filled out excepting his home and whom to notify in case of accident. The letters indicate that he took orders for tailoring houses. One letter showed that he was in the employ of the Great Western Tailoring company, 147-151 Fifth avenue. Chicago, It requested him to send rrom the other child. "I don't like medicine."

"I like medicine." said Elizabeth. "You take medicine, too."

For a time they argued over which should take the medicine first.

OBJECT TO ASSESSMENT.

U. S. Smelting Company Losing Money in Salt Lake County.

The smelters of the United States Smelting & Refining company in Salt Lake county are being run at a loss, according to a statement made by officials of that concern to the county board of equalization yesterday. They are assessed on \$500,000 net profits in the county and as they claim that they are making and as they claim that they are making they are assessed. and as they claim they are making nothing, naturally object to the assessment. It was explained that the smelters are used primarily to secure iron ore, which they use for fluxing purposes in their other smelters. It is cheaper for them to produce it this way than to buy it, acording to the statement made yesterday.
The board did not decide this question The Holy Cross hospital also objected to its assessment, claiming that other hospitals have been exempted on the grounds of being charitable institutions. This hospital was declared not to be a charitable institution by the supreme court in a decision in a recent damage The county attorney will investigate The board will sit again Monday, when the final decisions will be made in the various matters pending.

BRONCHIAL COUGHS

Breathe Hyomei's Healing Air and from here it will go to Denver. All Irrigation Will Be Quickly Cured.

The most irritating and annoying orm of cough is that termed bronchial. People subject to bronchial troubles whenever there is a change in the weather or they are exposed to a draft will "catch" a bronchial cough, which is very disagreeable, irritating and annoving.

Bronchial troubles cannot be cured by stomach dosing. The medicated air of Hy-o-mei is the only treatment that reaches the affected parts and gives relief and cure. It destroys all the disease germs that are present in the ose, throat and lungs, soothes and relieves the irritated mucous membrane in all parts of the bronchial tubes and

quickly overcomes the irritation. Bronchitis is really an inflammation of the mucous membrane lining the air passages and is purely a local disease. so that it needs a local treatment like that afforded by Hy-o-mei.

If there is any doubt in your mind as to the power of Hy-o-mei to cure bronchial troubles so that the system will resist coughs and colds, the unusual way in which it is sold by F. C. Schramm should dispel that doubt. He agrees to refund the money to any purchaser of Hy-o-mei who is not perfecty satisfied with the results following the use of the remedy. He takes all the risk, and if the remedy does not help you it does not cost a penny, while if it cures, the expense is nominal, for a complete Hy-o-mei outfit is sold at

The officials of the line stationed here, however, say this cannot be done for several months. Important work is now being done of the ten or fifteen miles of track that runs around the shore of Great Sait lake from Garfield to Grantsville. The lake is so high that there is water on both sides of the track grading and for the past two weeks the Western Pacific officials have been dumping great carloads of stone along the embankment to strengthen the road against the high waves. No serious

trouble, however, is anticipated along this section of the road.

The officials of the line say the heaviest part of the grading on the 120-mile gap to Elko is done and that only the light work remains. Over beyond Elko the road is progressing in excellent man-ner and no great trouble is looked for in
